

Week 4

3-July to 7-July

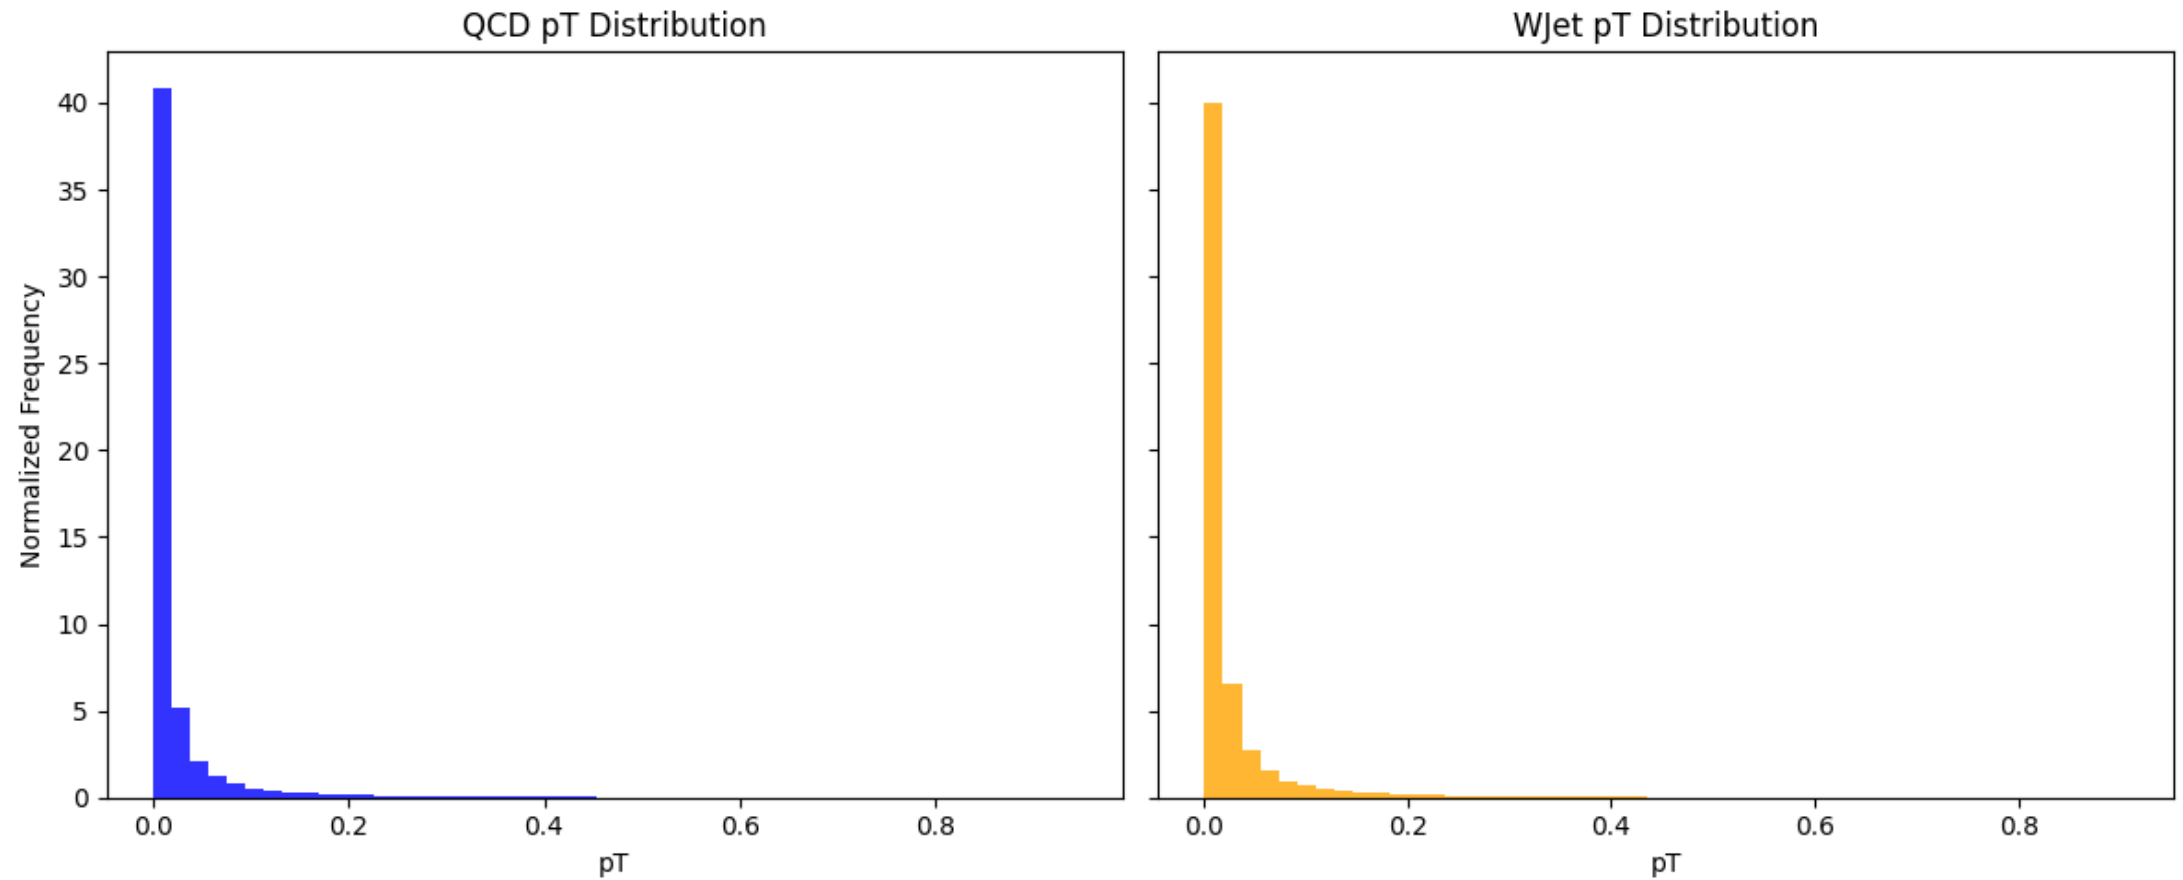

Goals

- Compare p_T for both samples – make sure they align
- Check if the configuration with mass works well for distance

Samples Used

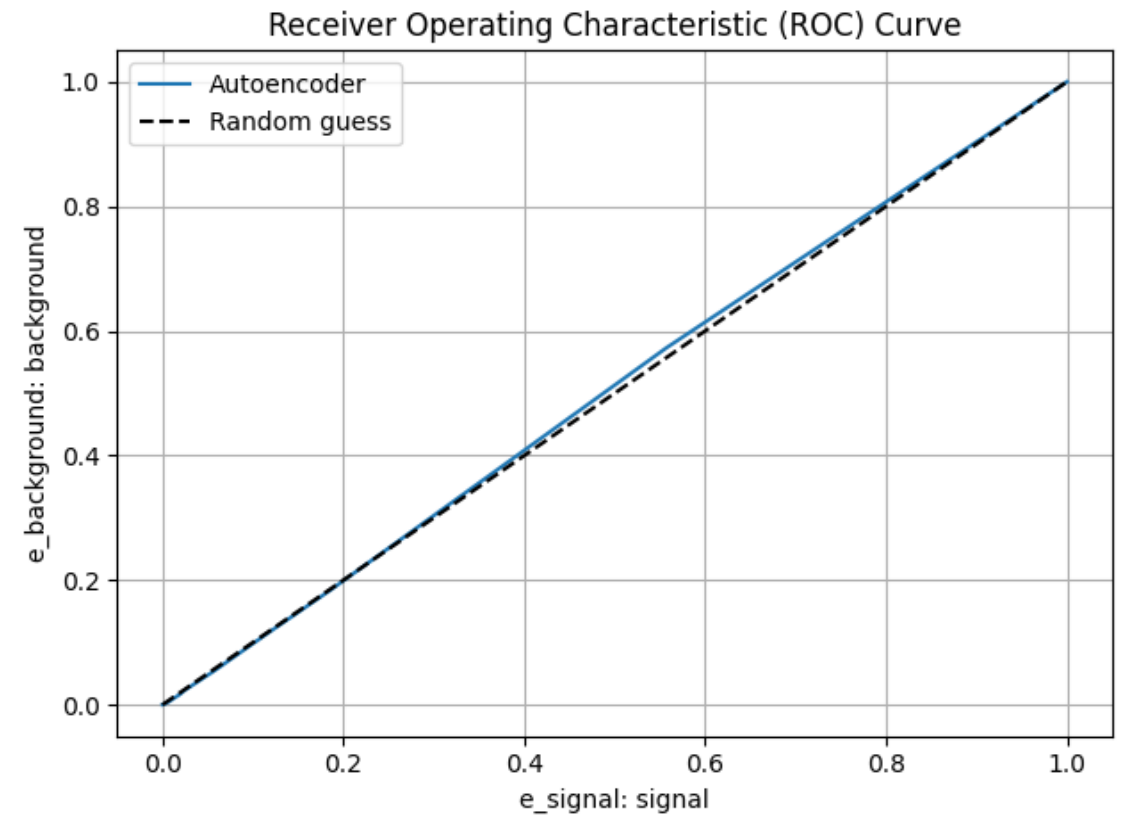

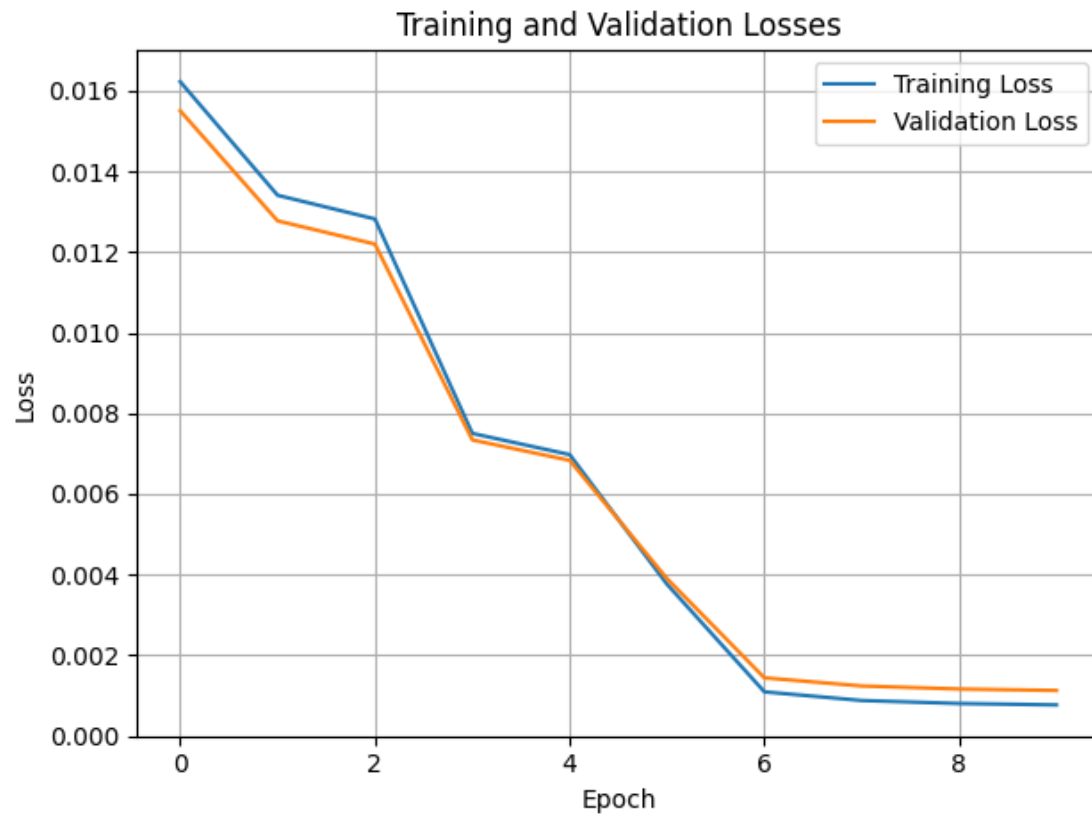

- QCD_PT-470to600_TuneCP5_13p6TeV_pythia8_1.root
- WJetsToQQ_HT-400to600_TuneCP5_13TeV-madgraphMLM-pythia8/WJetsToQQ_HT-400to600/211108_171900/0000/nano_mc2017_124.root
- Used 100k events from both files

pT Comparison

Best Config When Using Distance

AUC: 0.489

Next steps

- Implement decaying learning rate
- Expand search space in parameter sweep
- Make edges a combination of mass and distance
