

Week 1: 13 – 20 June

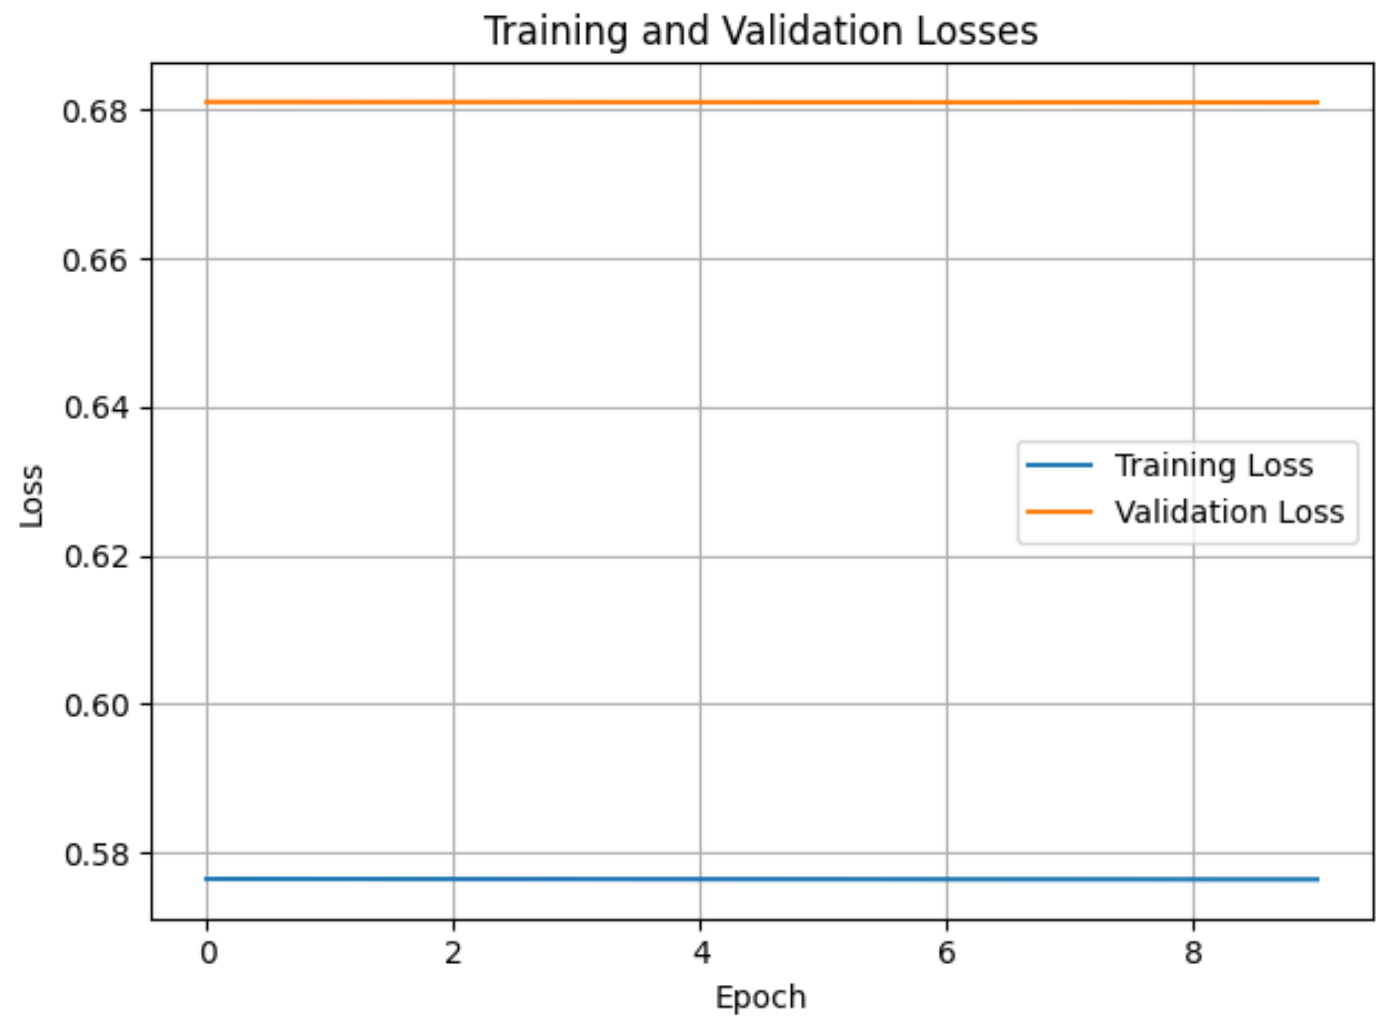

Goals

- Get the model working
- Implement a basic correlation heatmap to improve upon
- Specifications:
 - Background: QCD
 - Signal: WJet
 - Batch size: 32

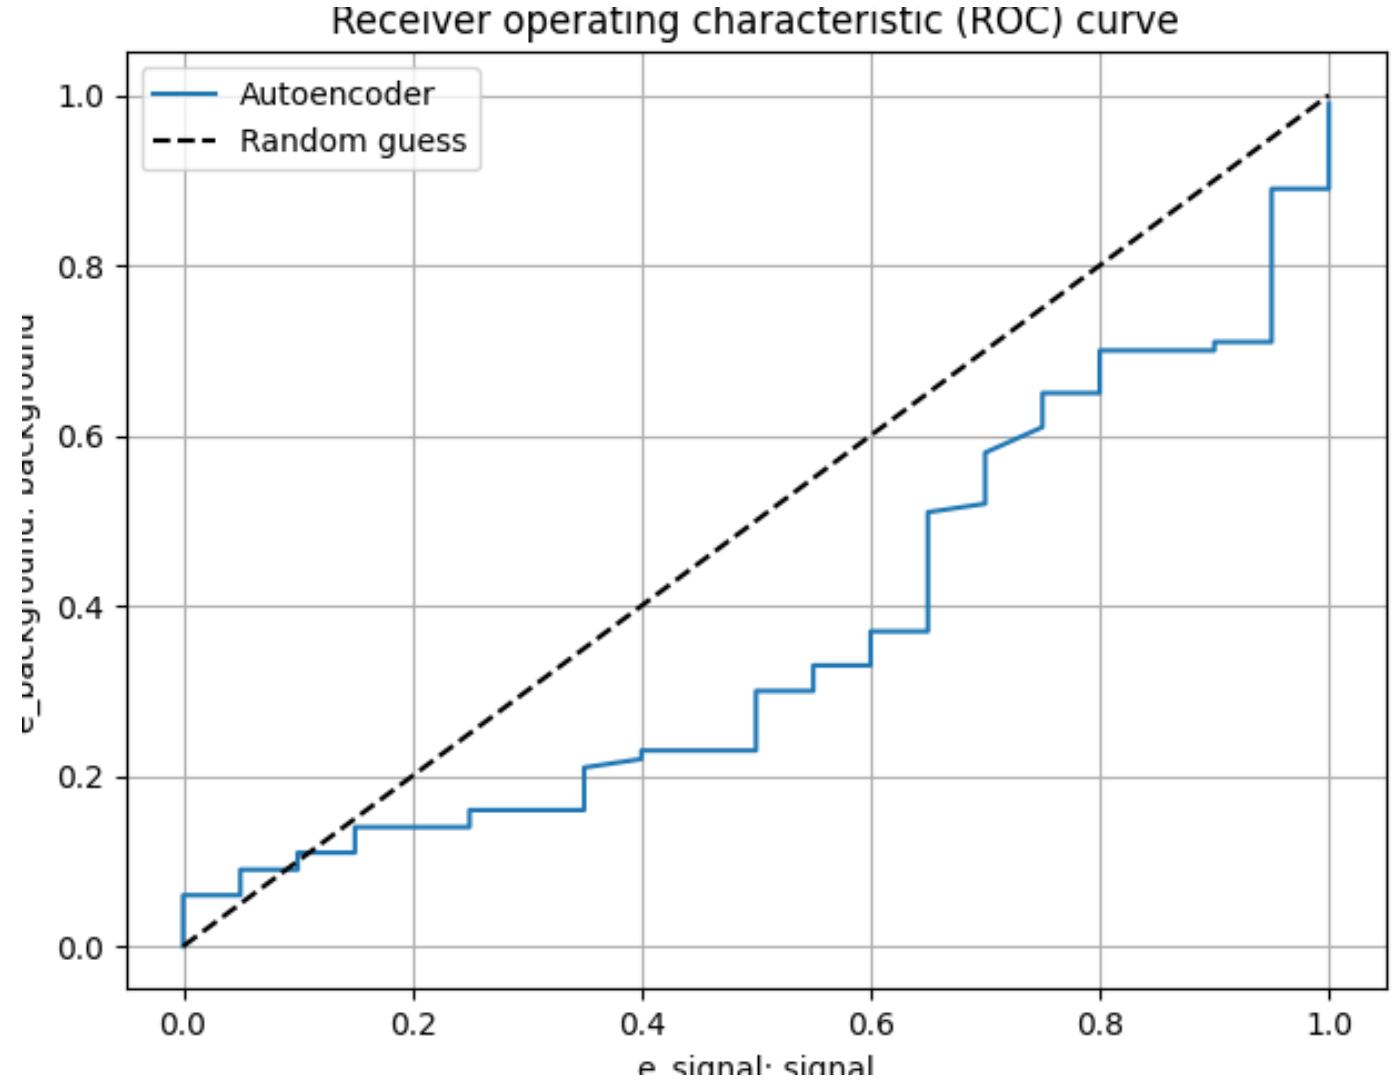

Run 0: 20
Events

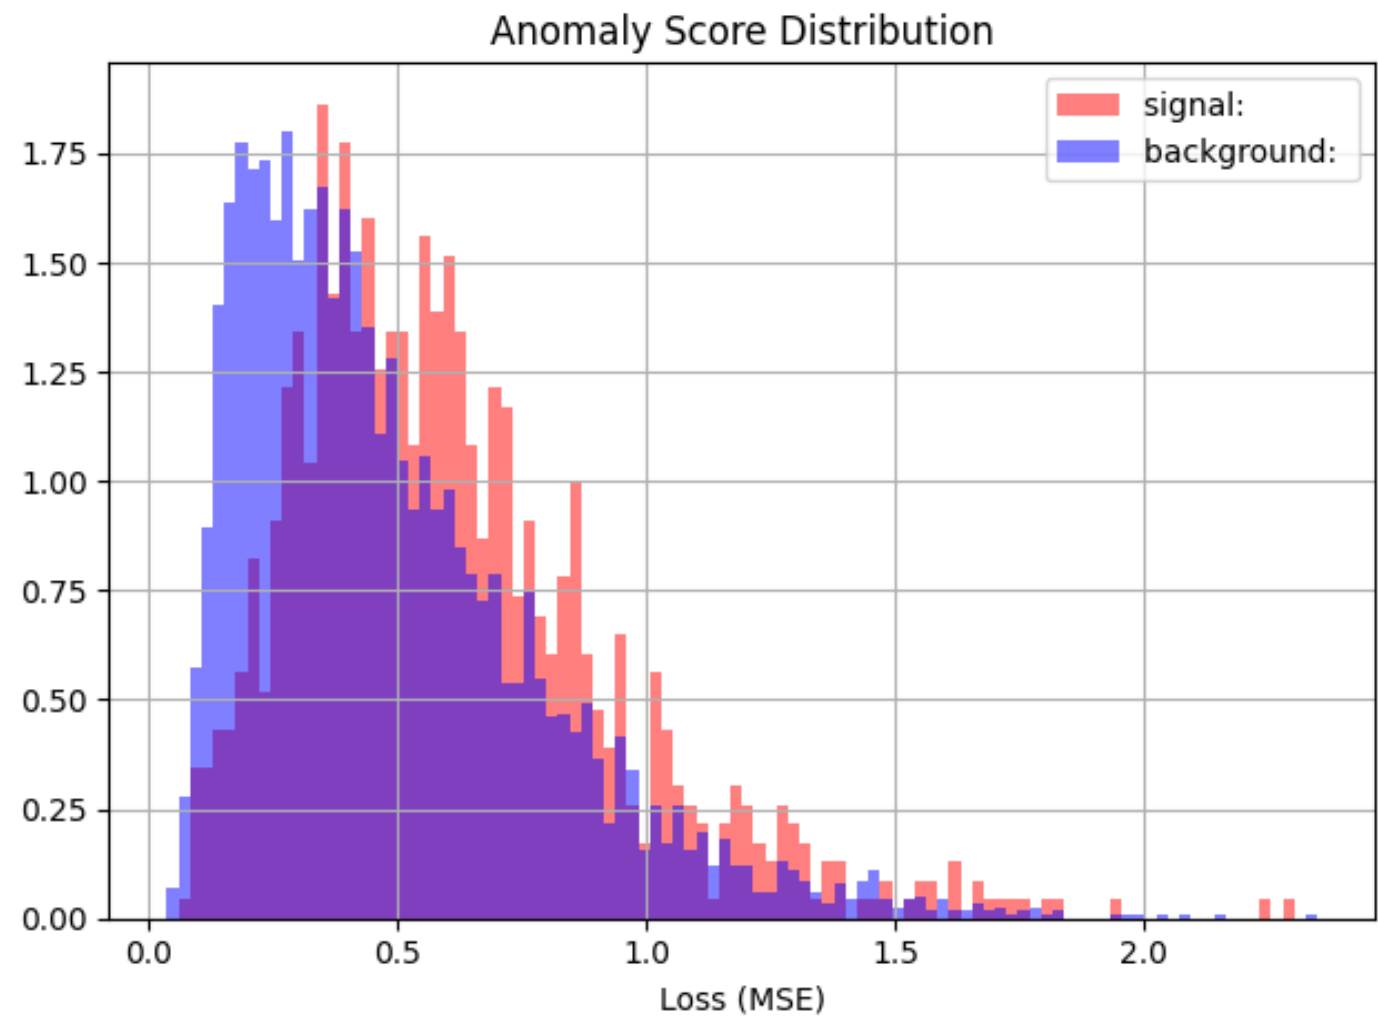

Run 0: 20
Events

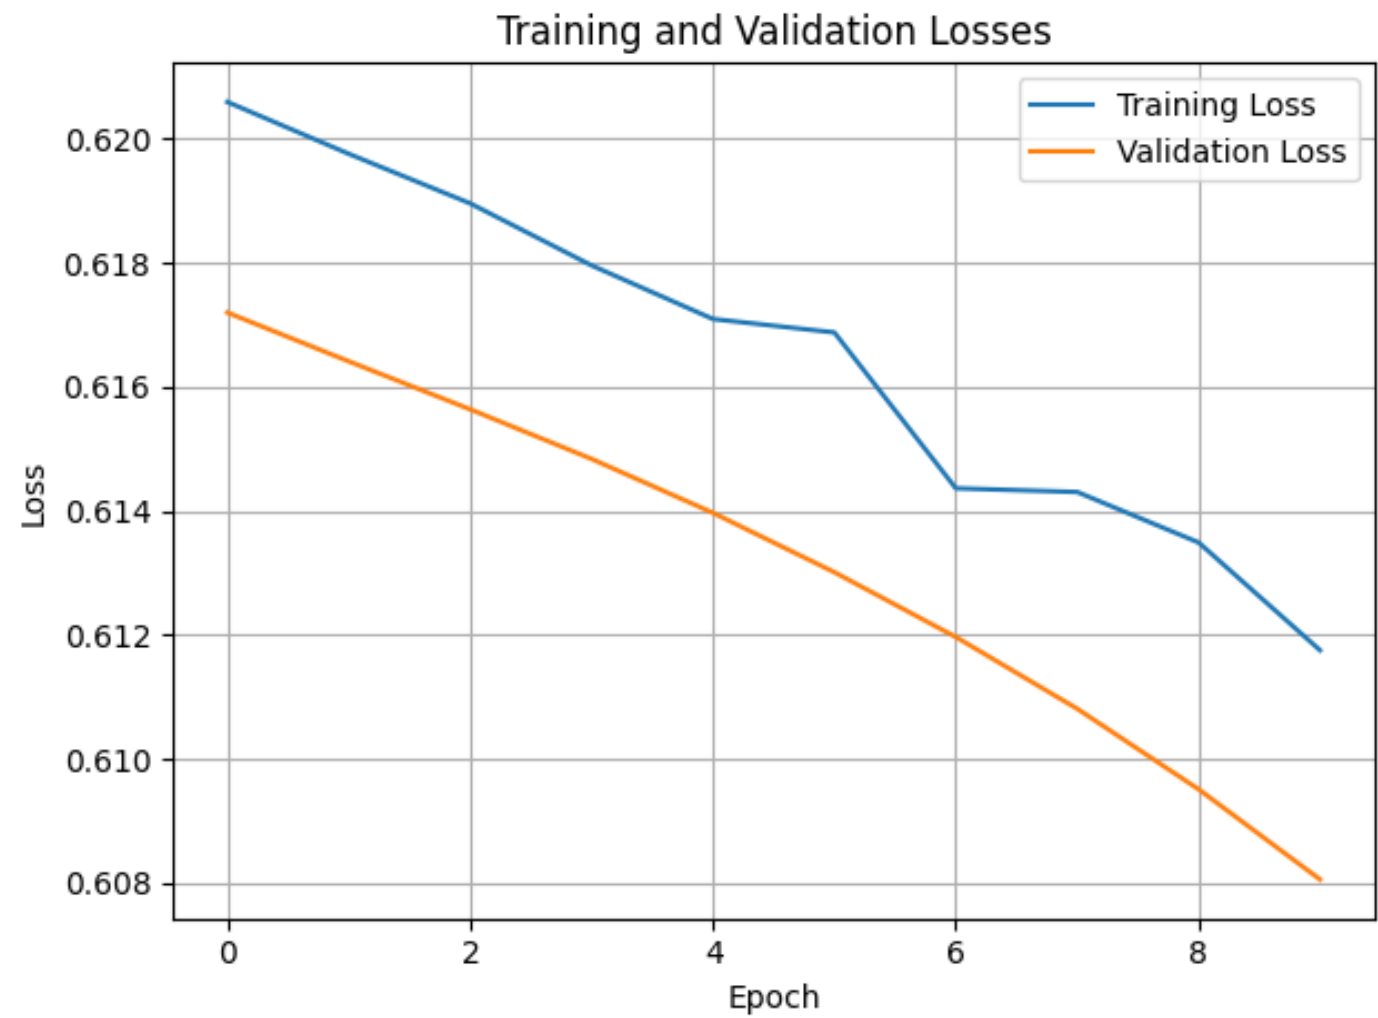

Run 0: 20
Events

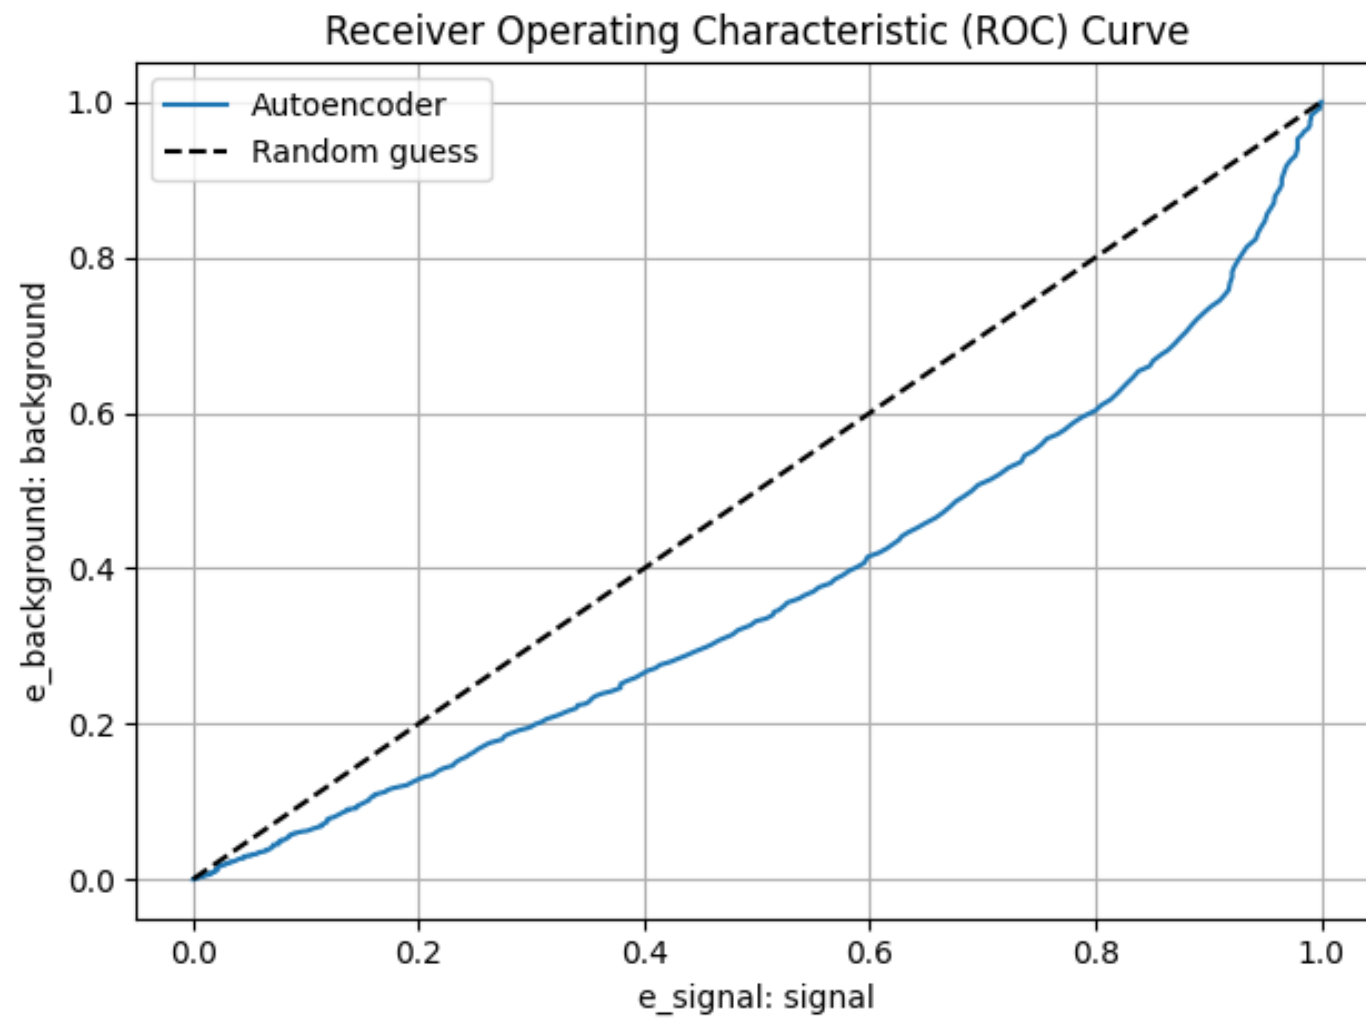

Run 1: 5000
Events

Run 1: 5000
Events

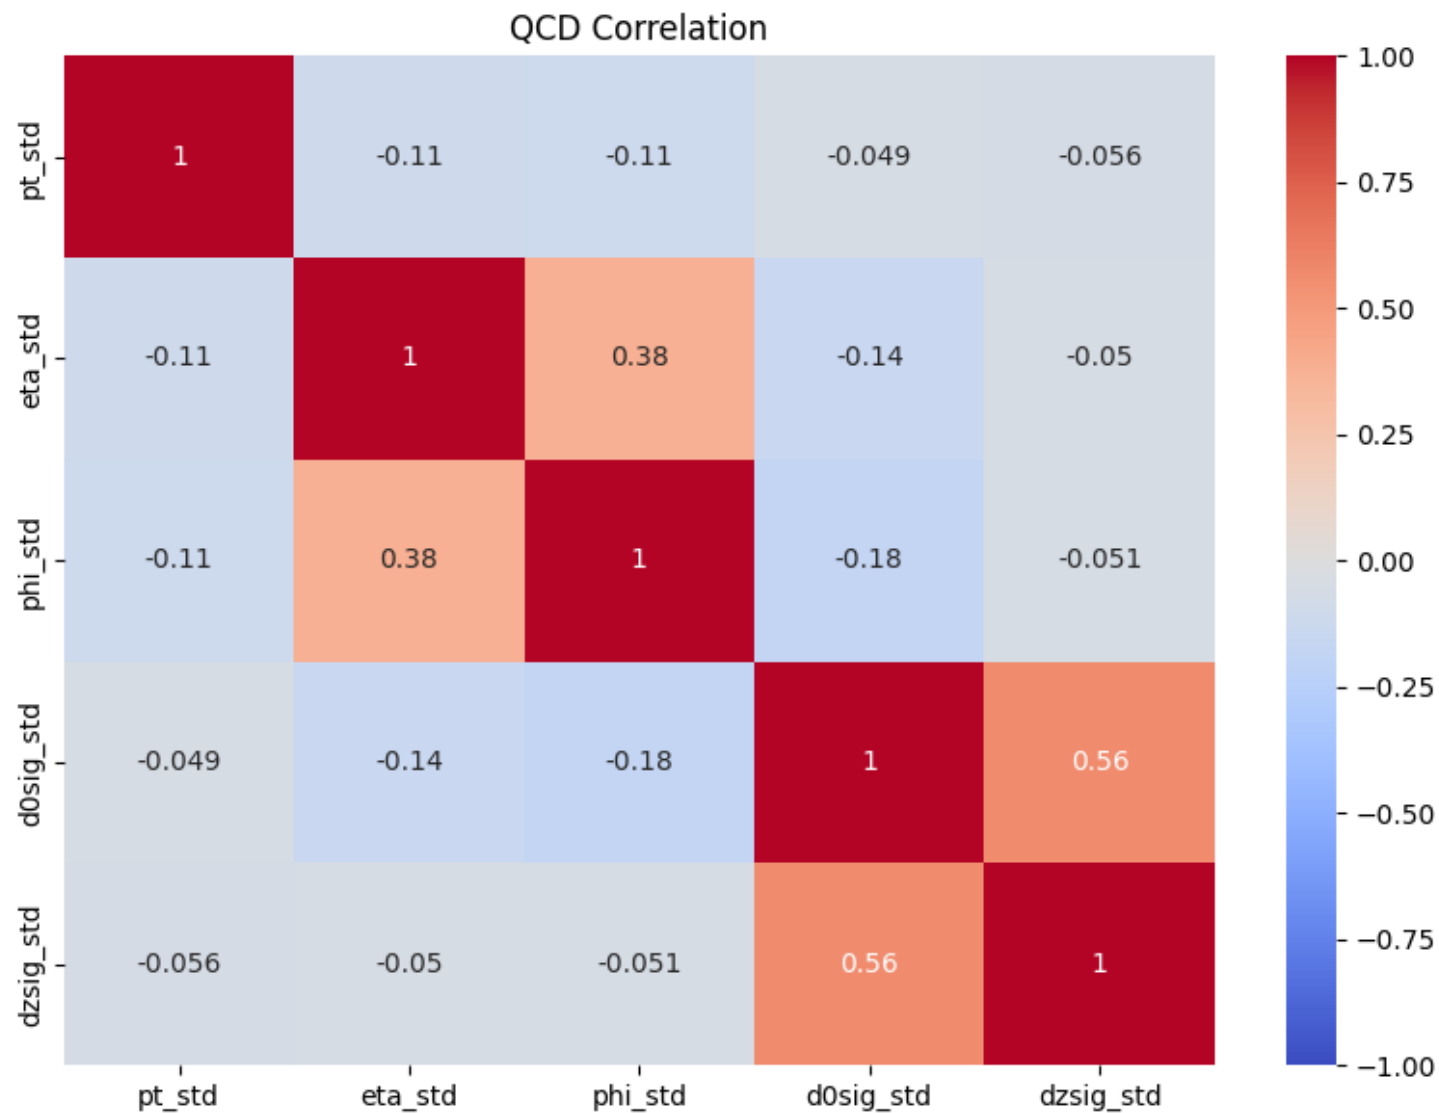

Run 1: 5000
Events

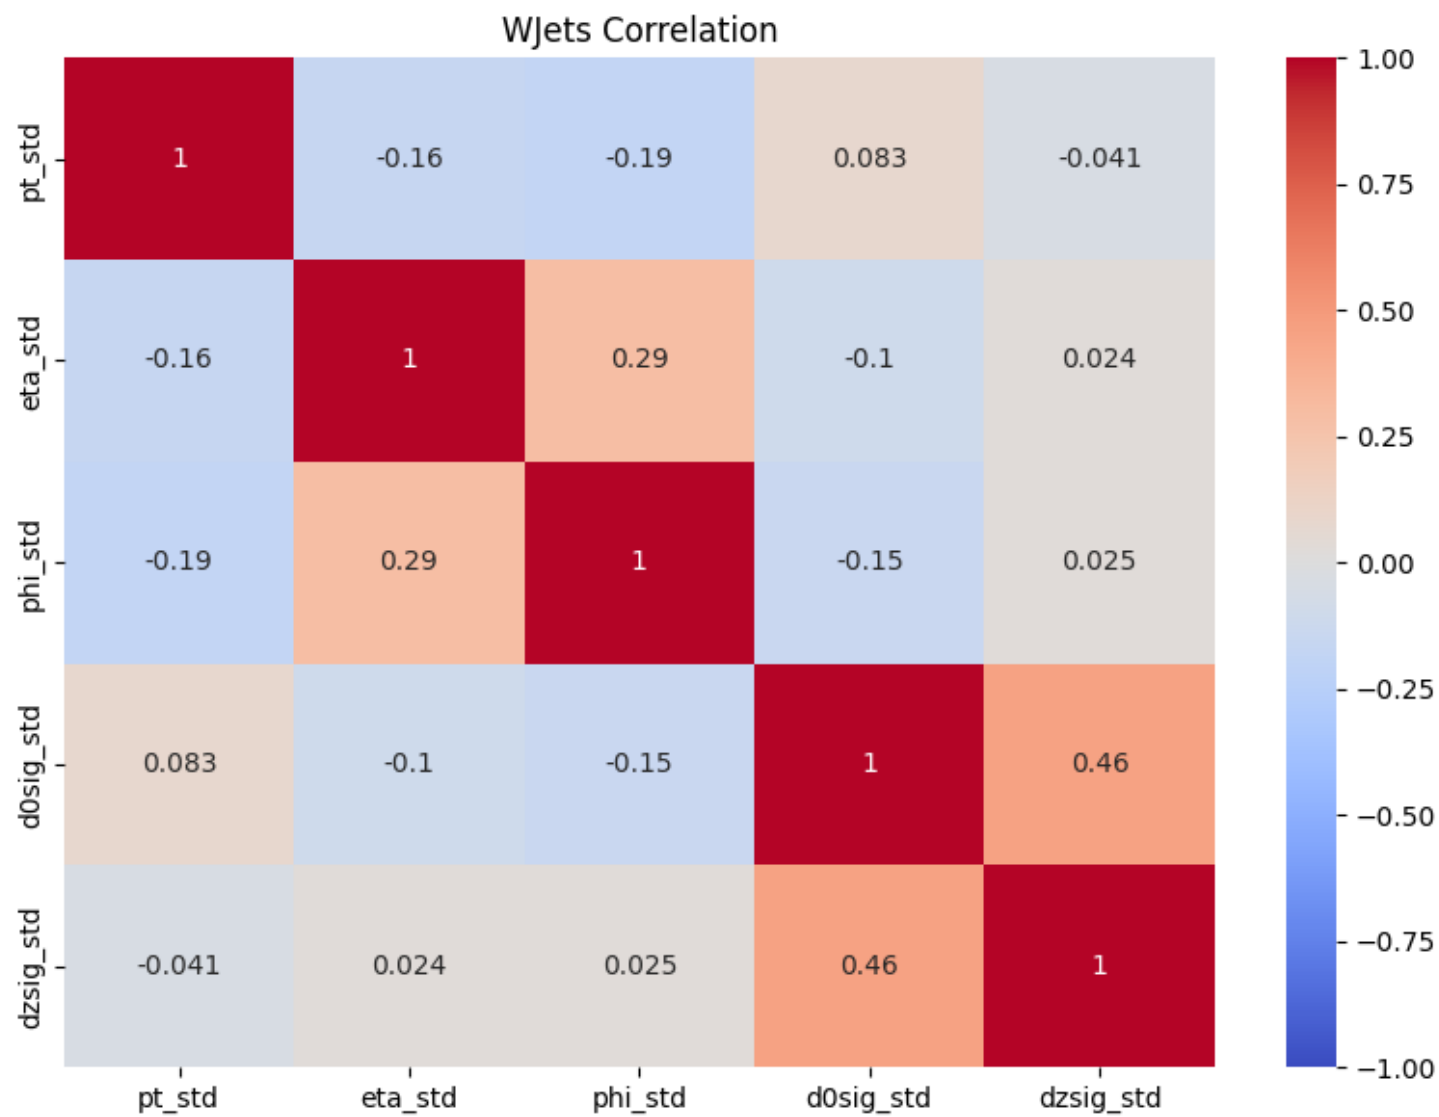

AUC: 0.373

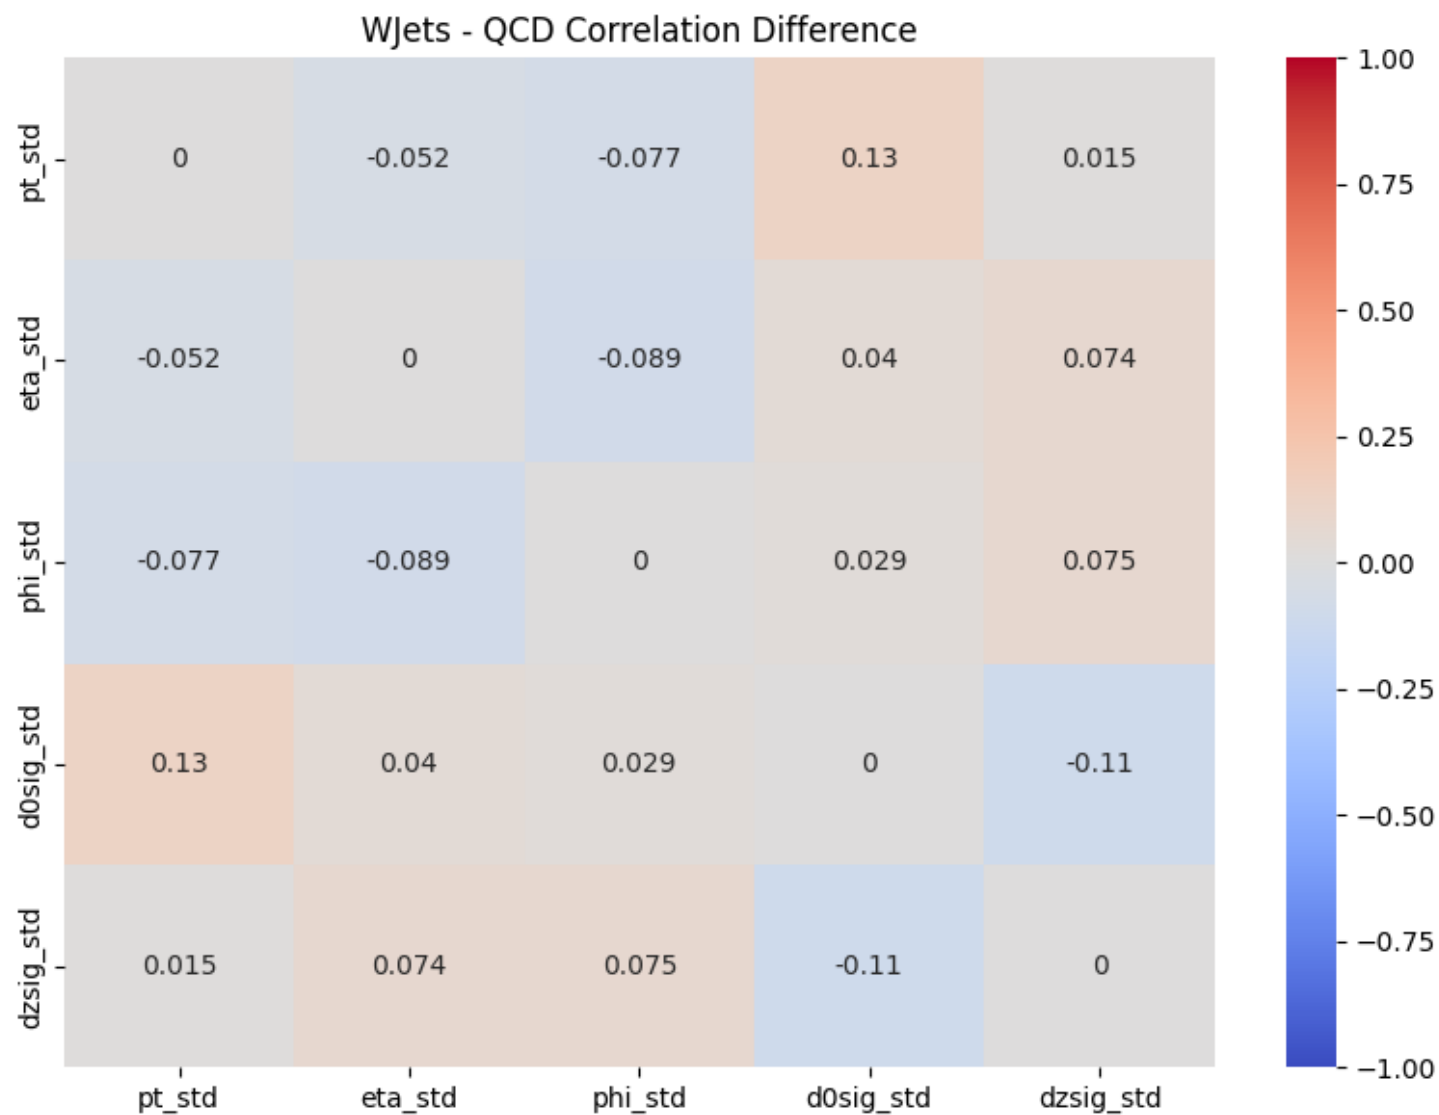

Heatmaps

Heatmaps

Heatmaps

Next steps:

- Train the model on 20k samples
 - Improve AUC score – vary the weights on different parameters
 - Implement true bump hunt statistics
 - Improve heatmap
-
- Any suggestions/feedback are much appreciated!
