

Week 8

28 July – 1 August

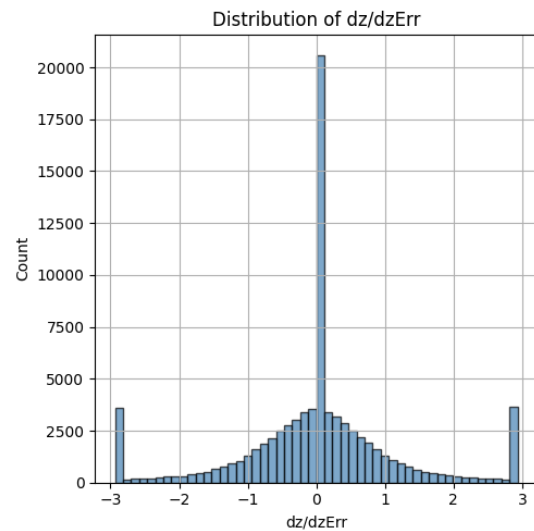

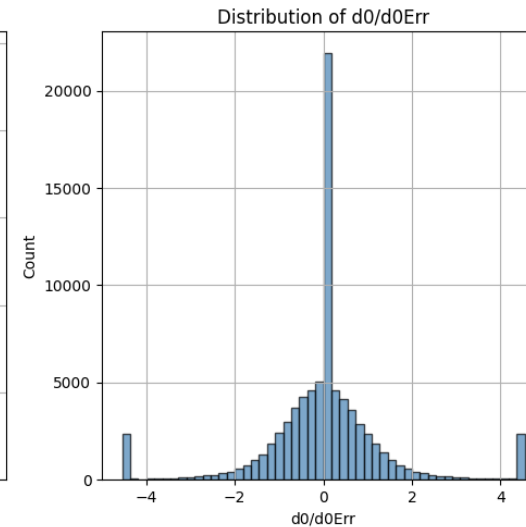

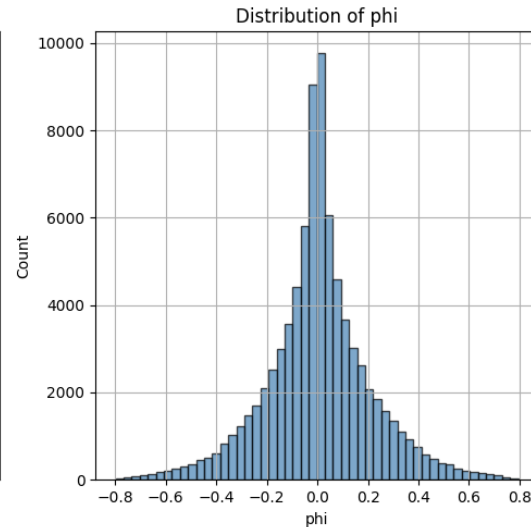

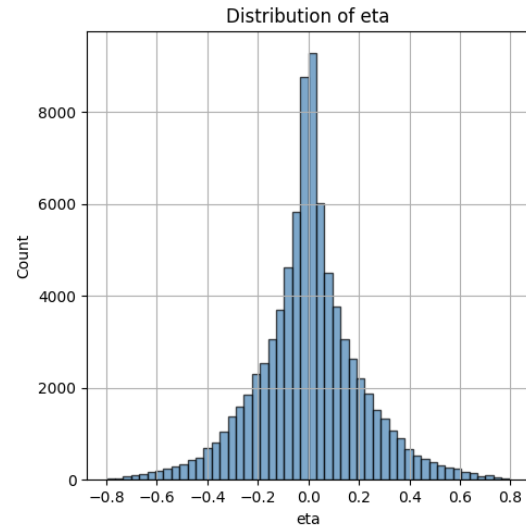

Goals

- Train on sliced QCD data to match WWto4Q: p_T 200-300 GeV
- Isolate features: try training on only significances

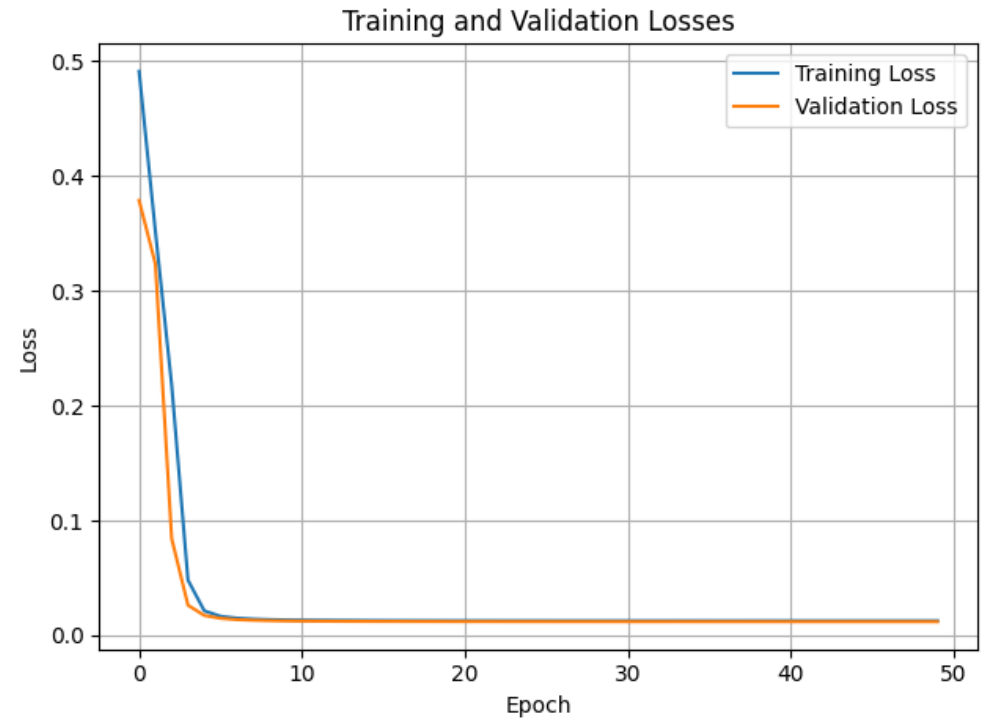

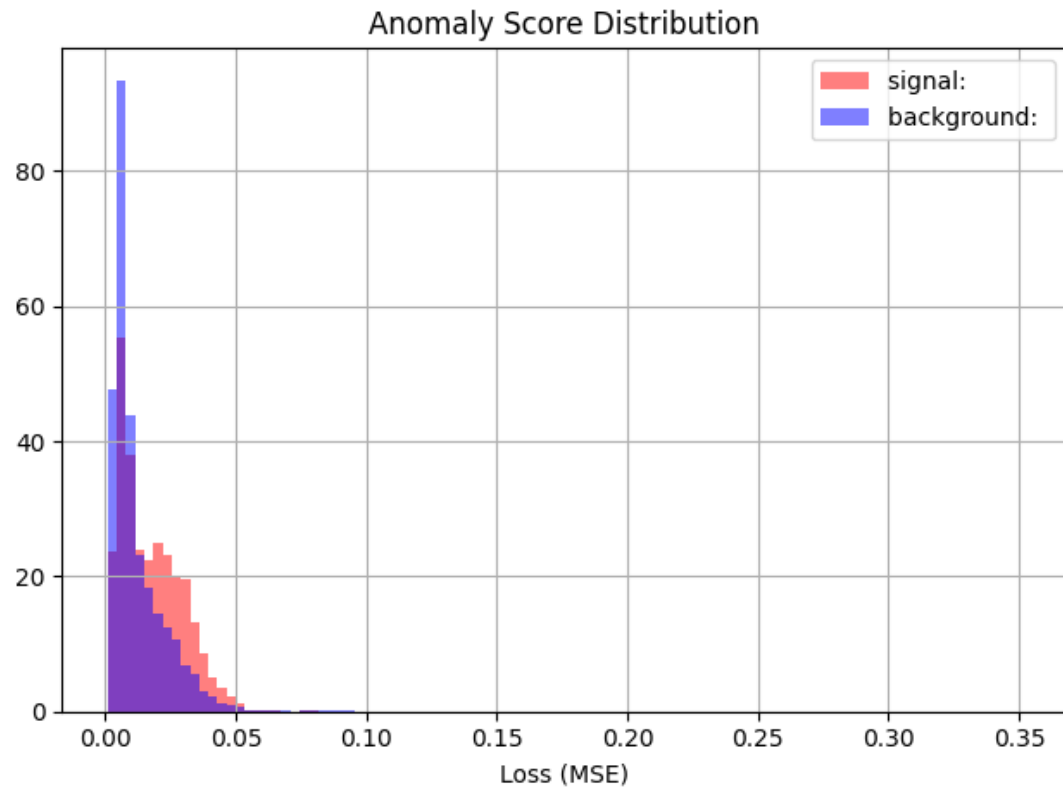

Feature Distributions: QCD

Feature Distributions: QCD

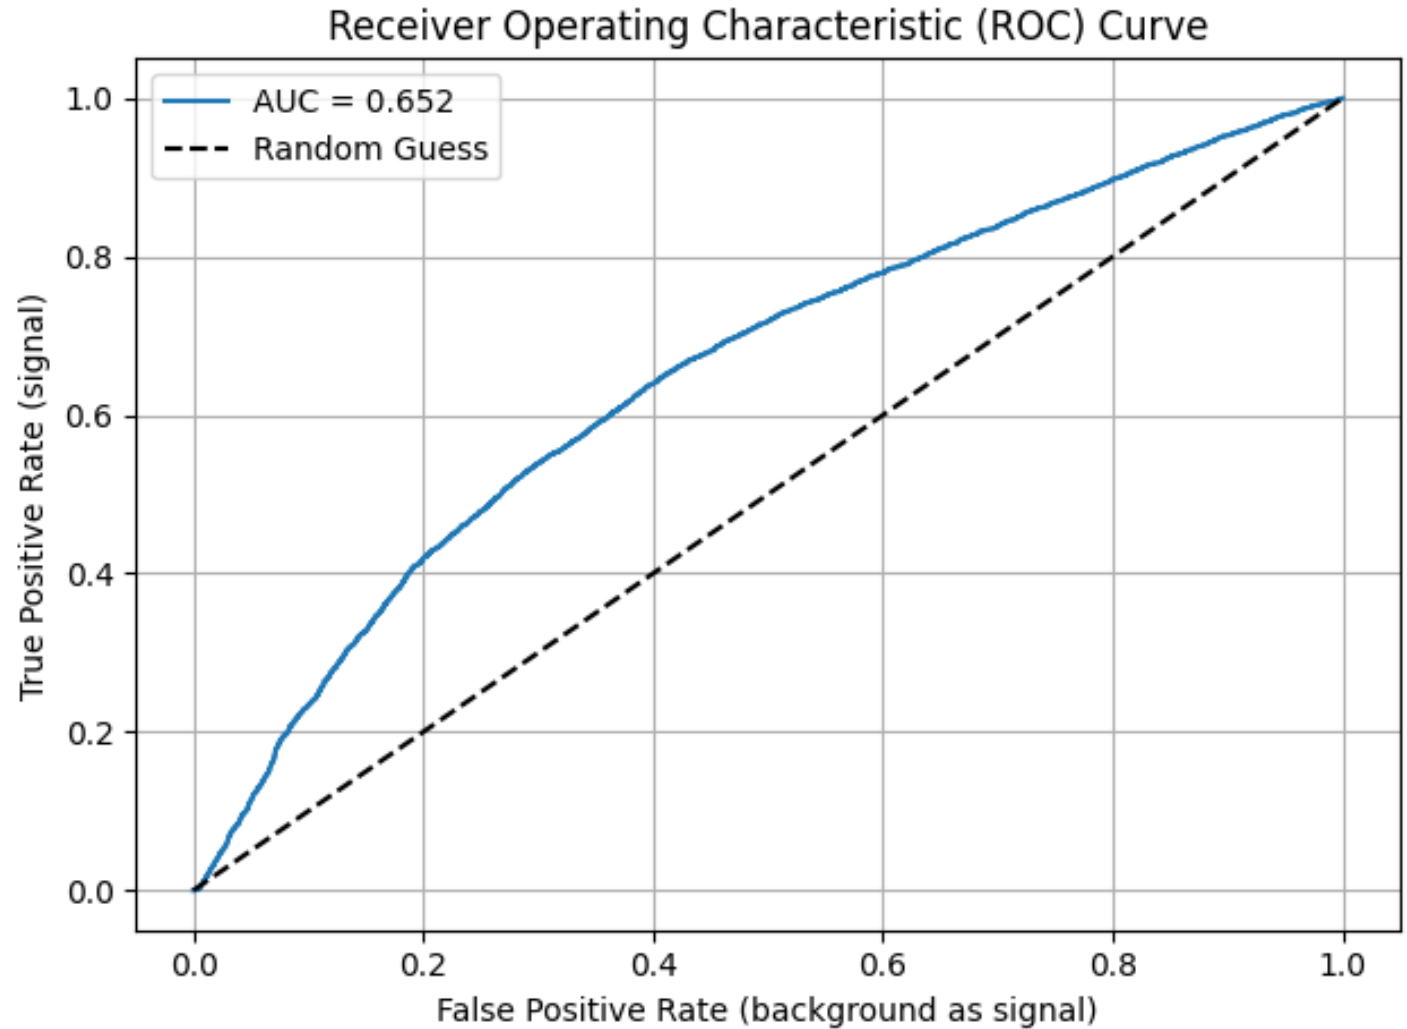

50000 Events

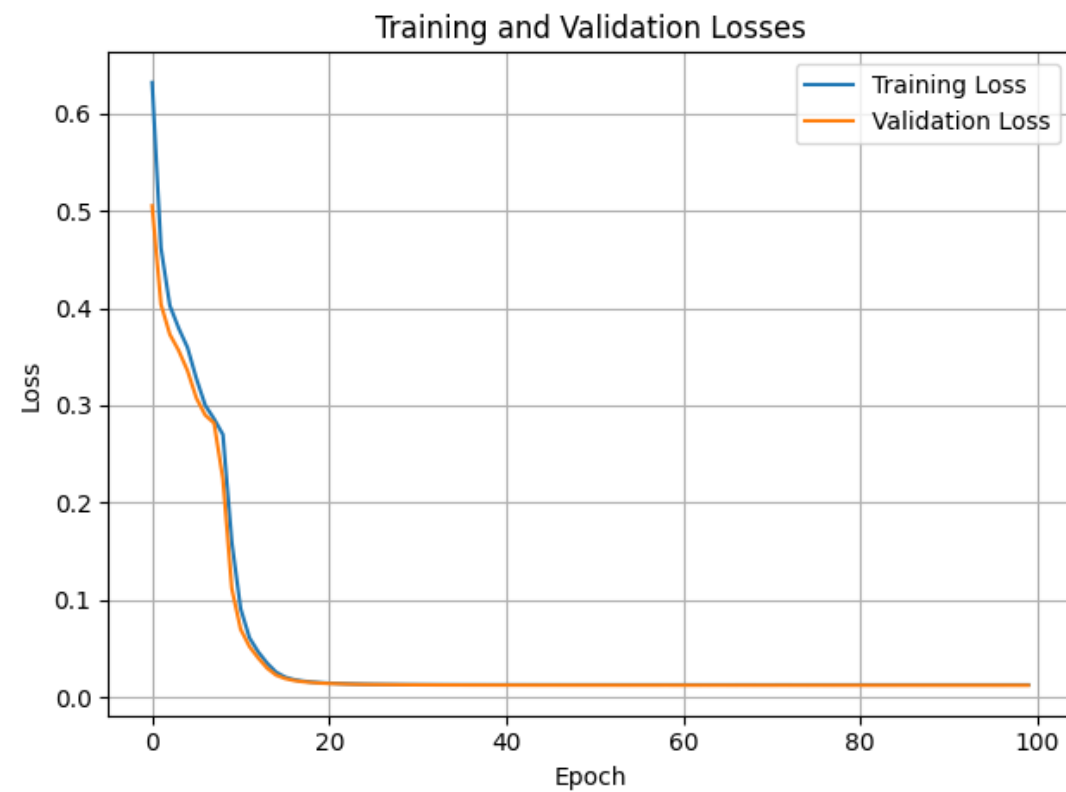

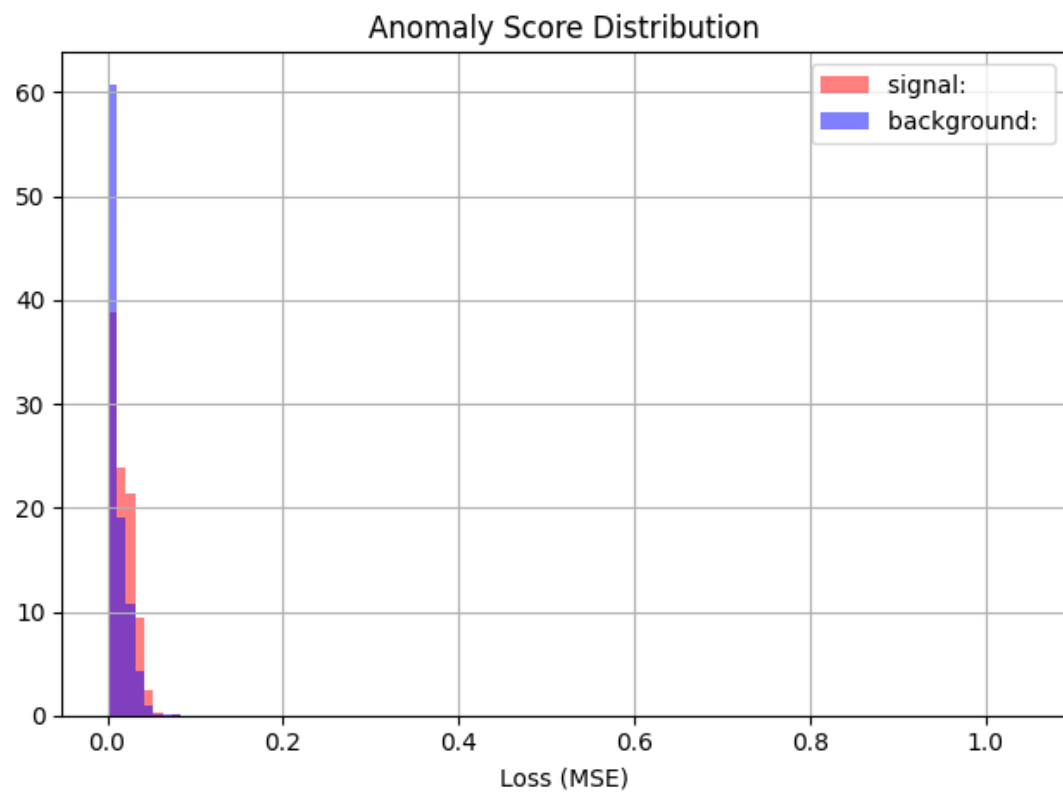

50000 Events

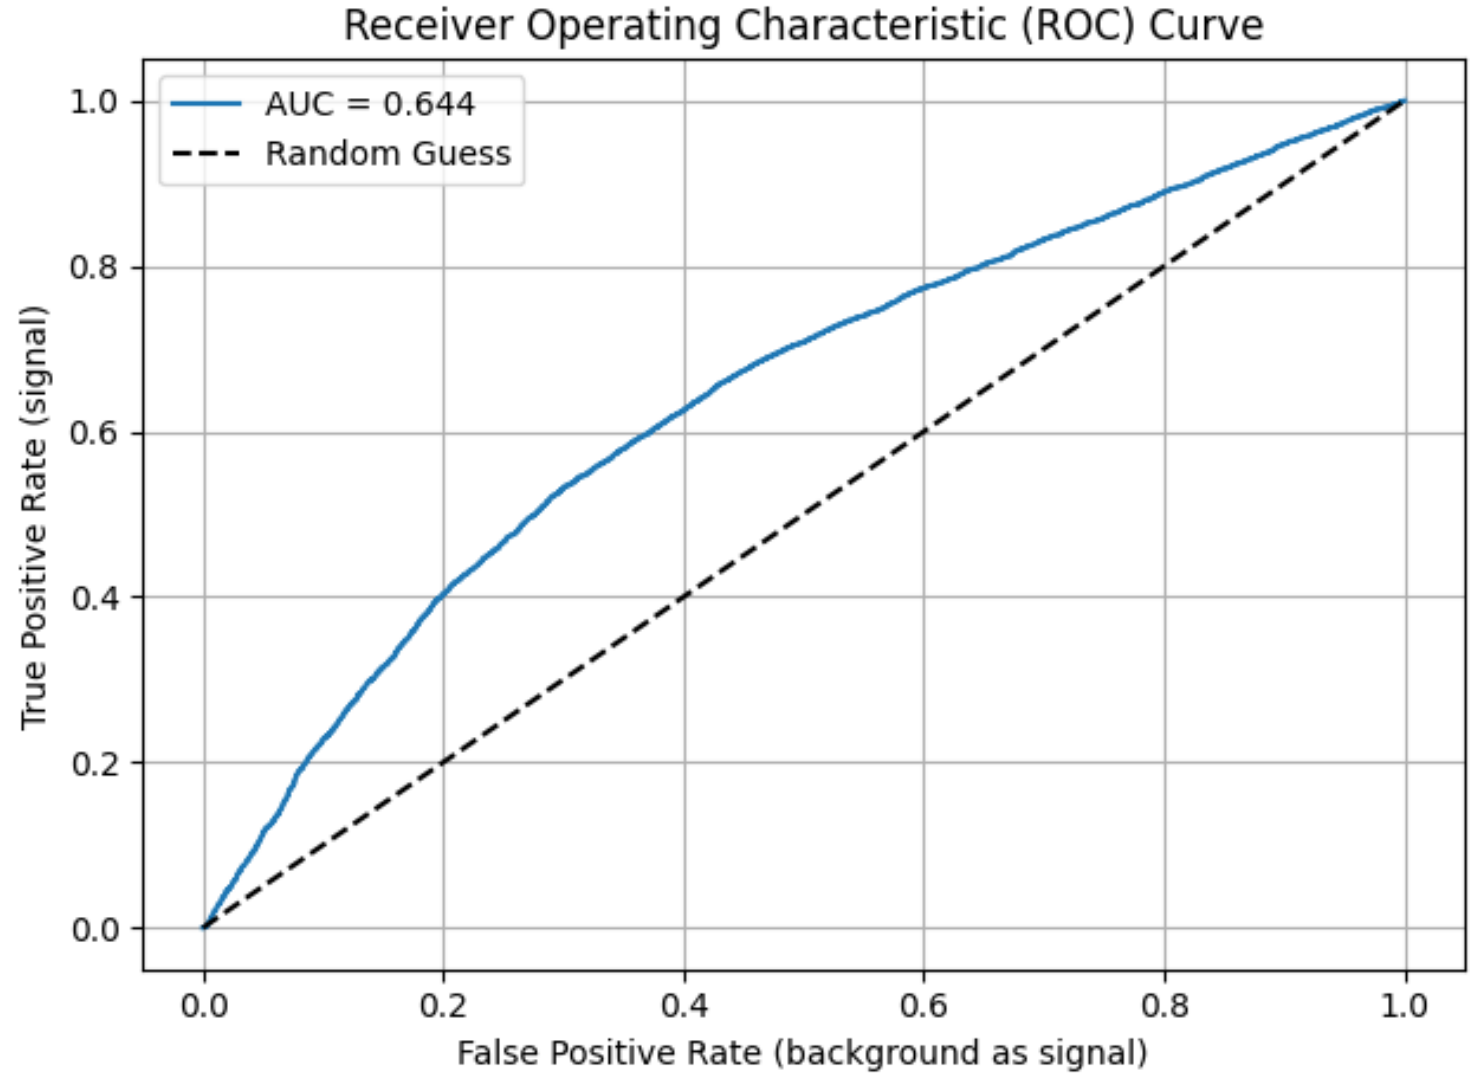

- Jordan's AUC: 0.594

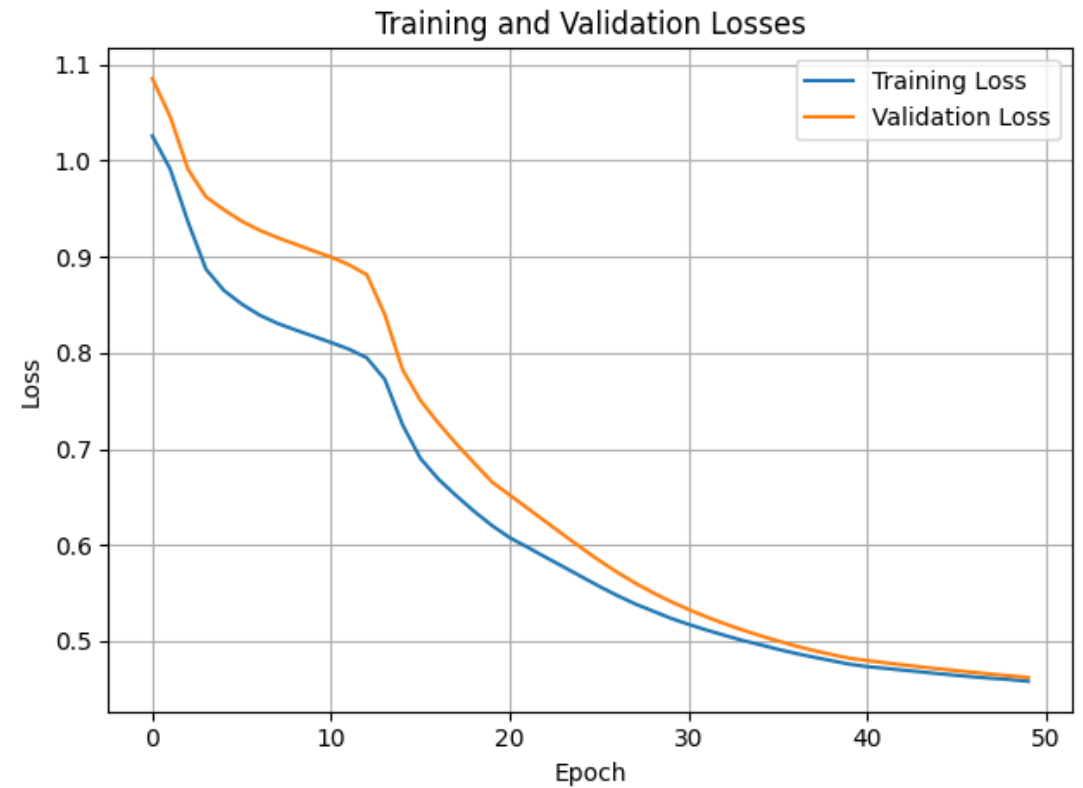

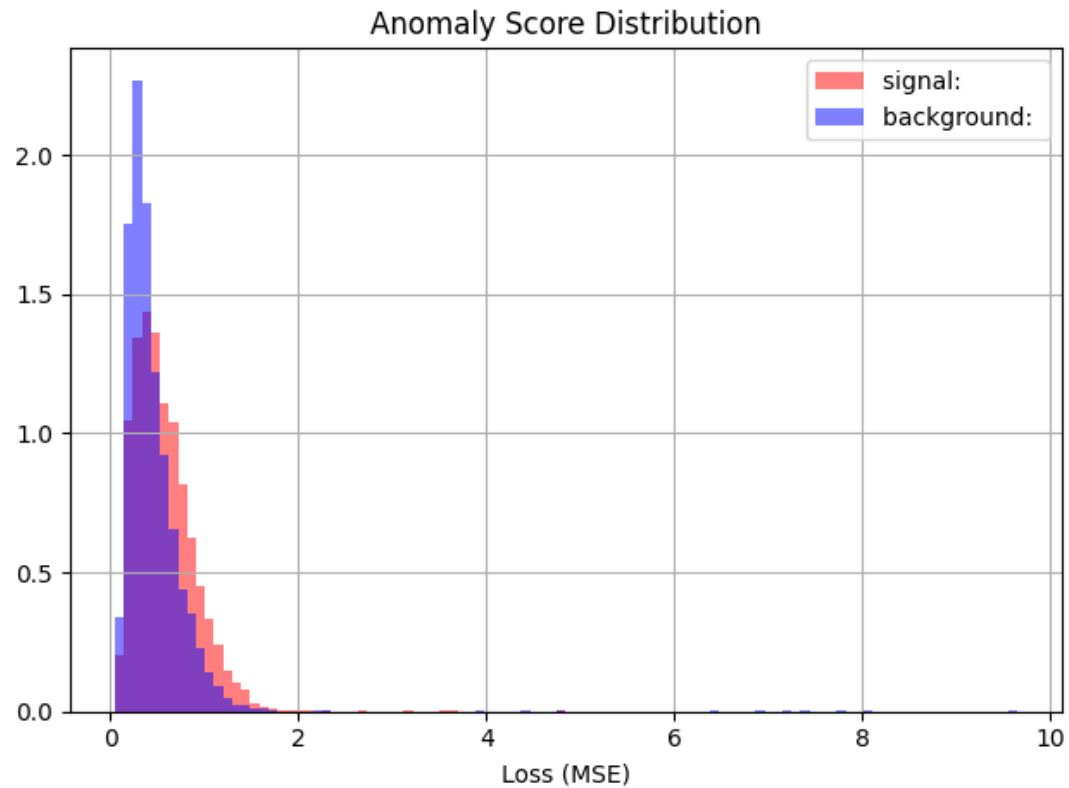

Full Dataset

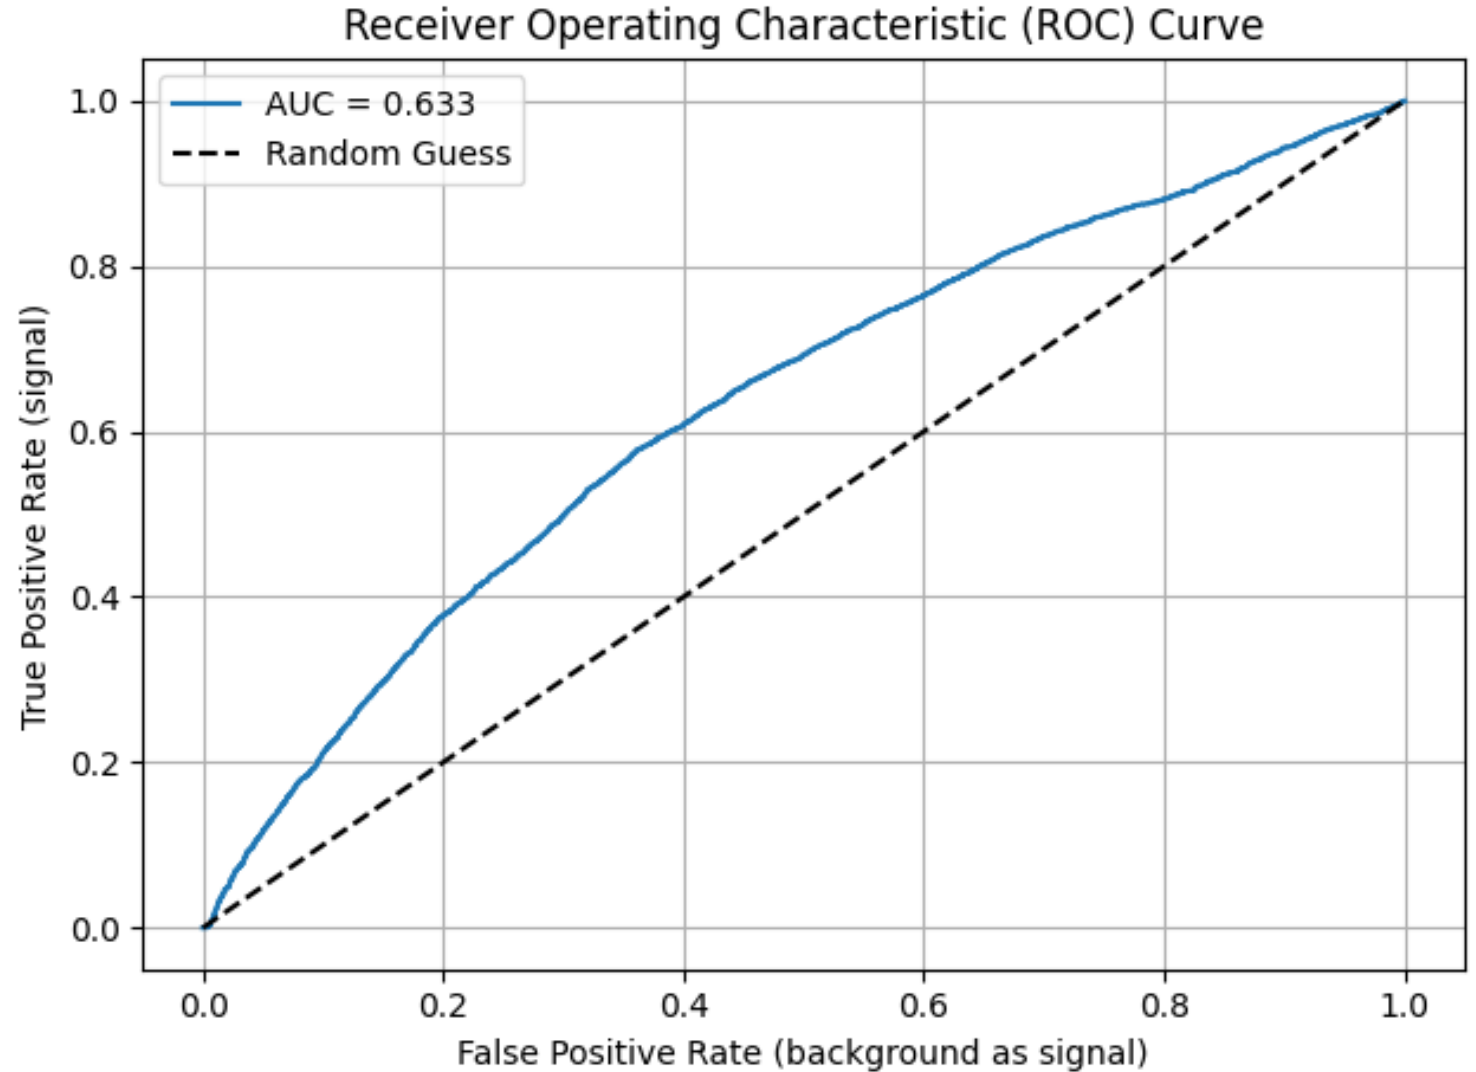

Full Dataset

Only pT, dz/dzErr, d0/d0Err

Only p_T ,
 dz/dz_{Err} ,
 $d0/d0_{Err}$

Next Steps

- Use WminusH as the signal
- Try using QCD and WWto4Q as background and WminusH as signal
- Try using other features?
