

Week 9

1-Aug to 5-Aug

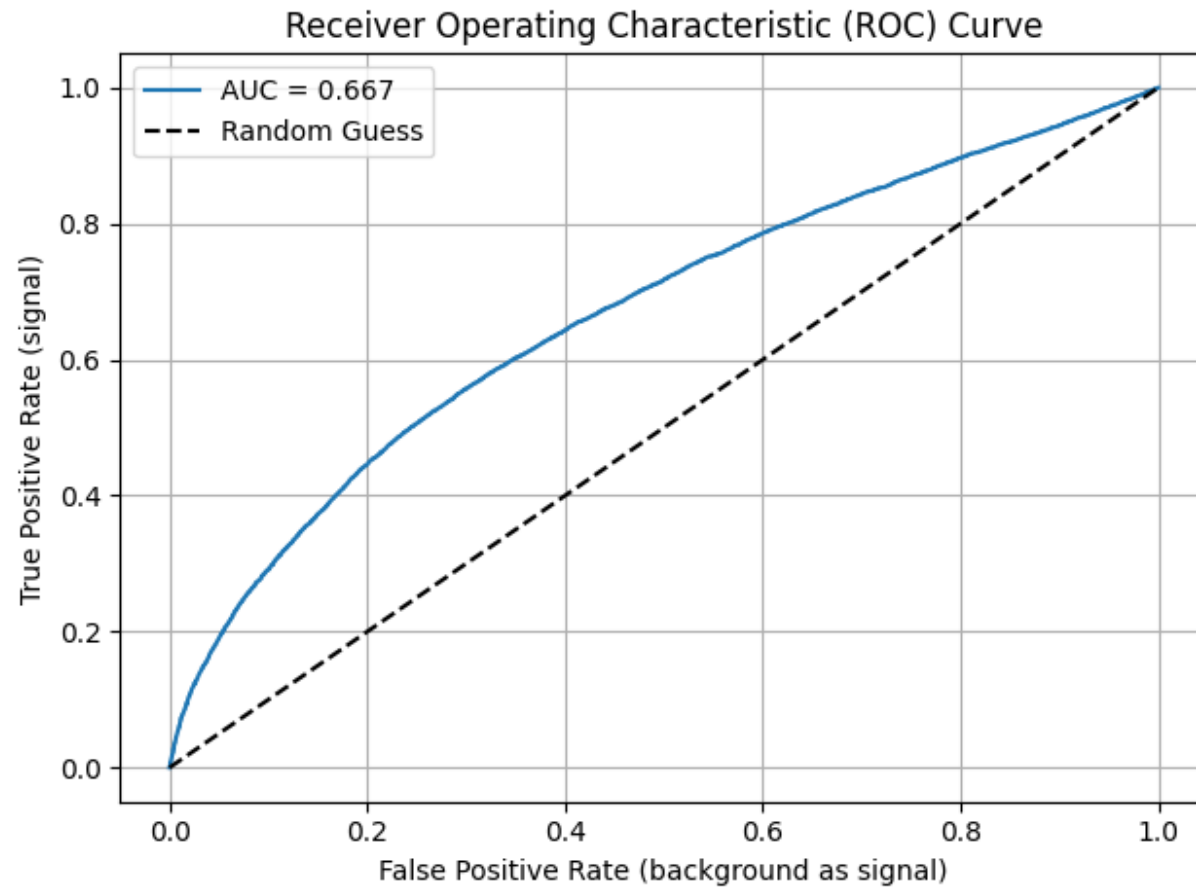

Goals

- Train on a wider pT range: 200 – 400 GeV
- Use invariant mass as edge weights
- Combine Euclidean distance (eta/phi) with mass as edge weights

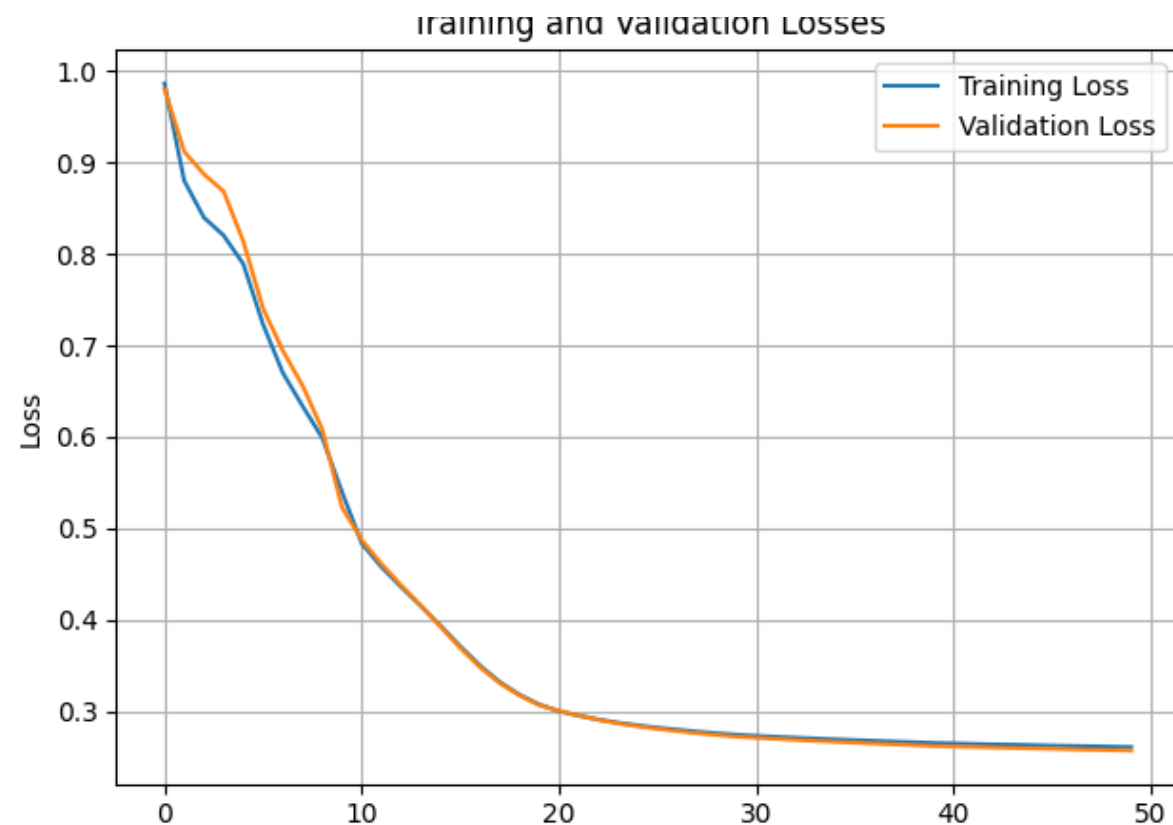

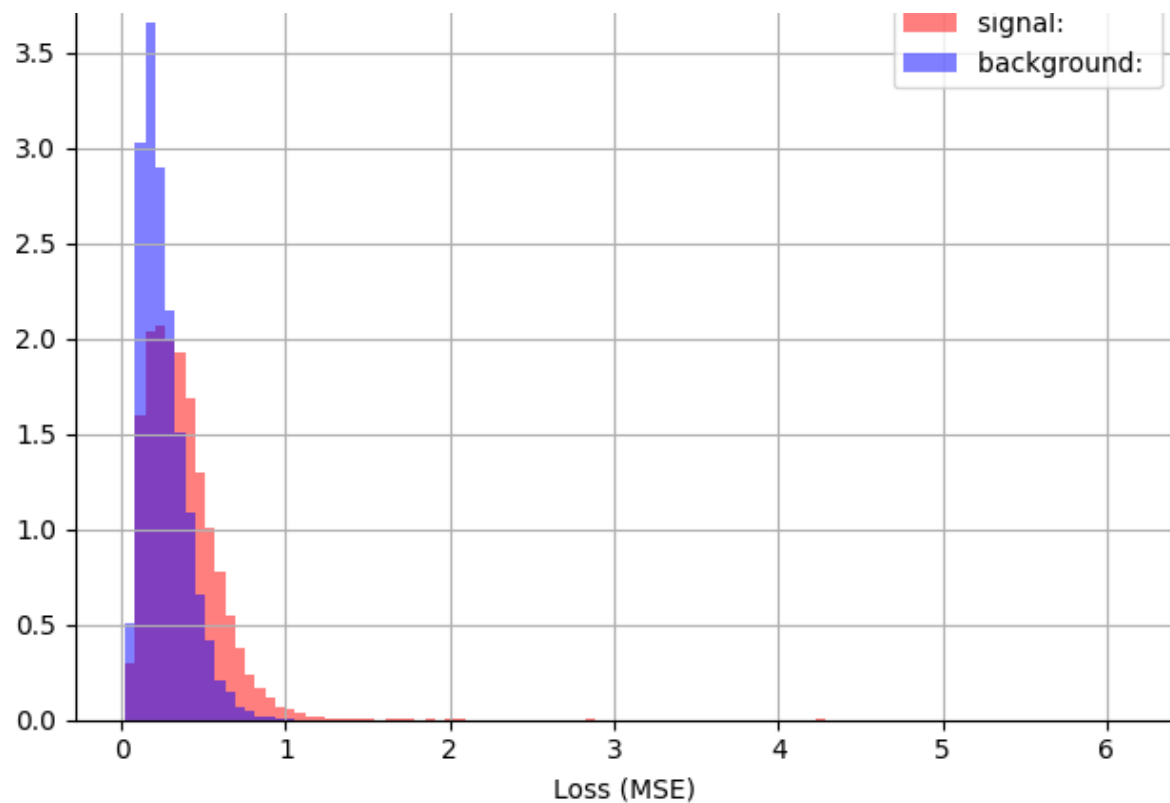

Eta-Phi

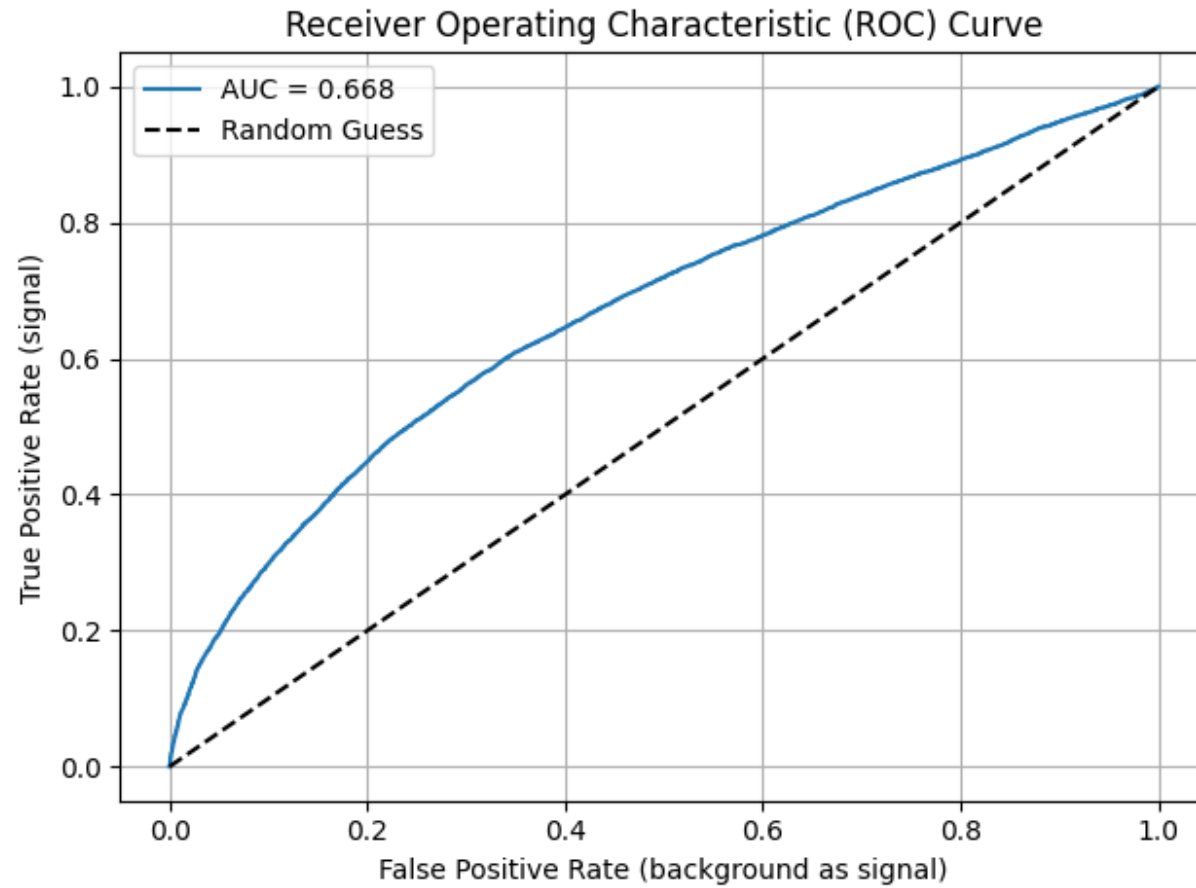

Eta-Phi

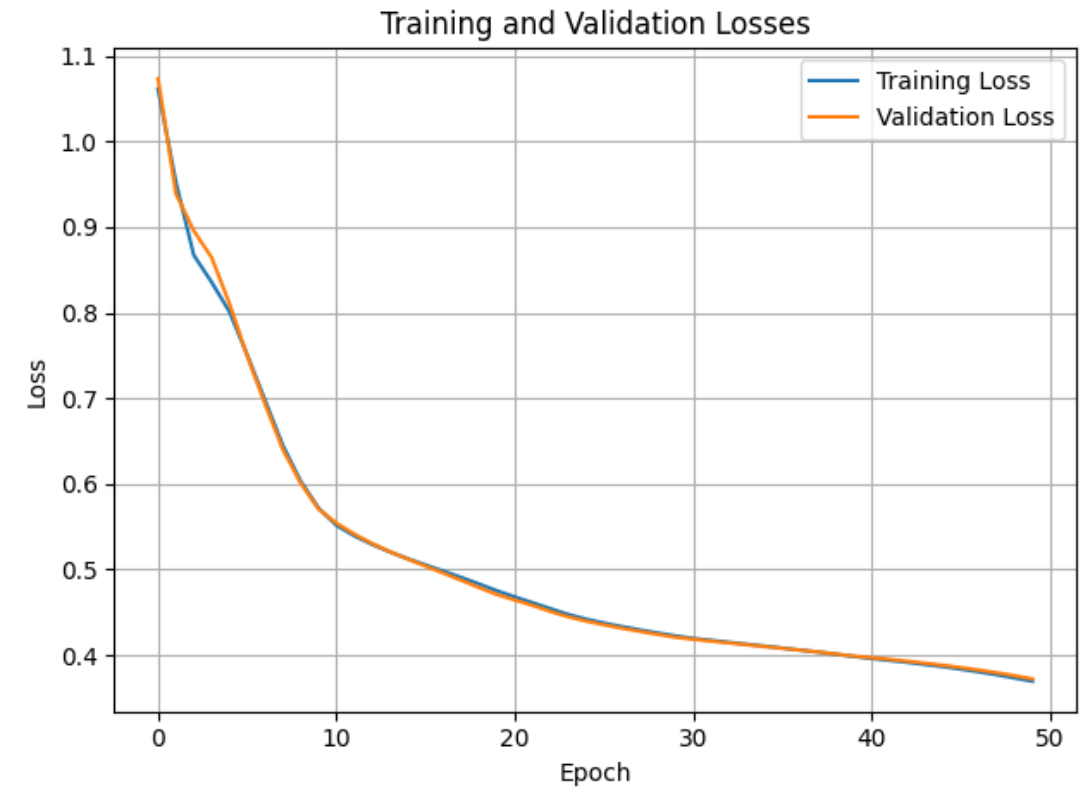

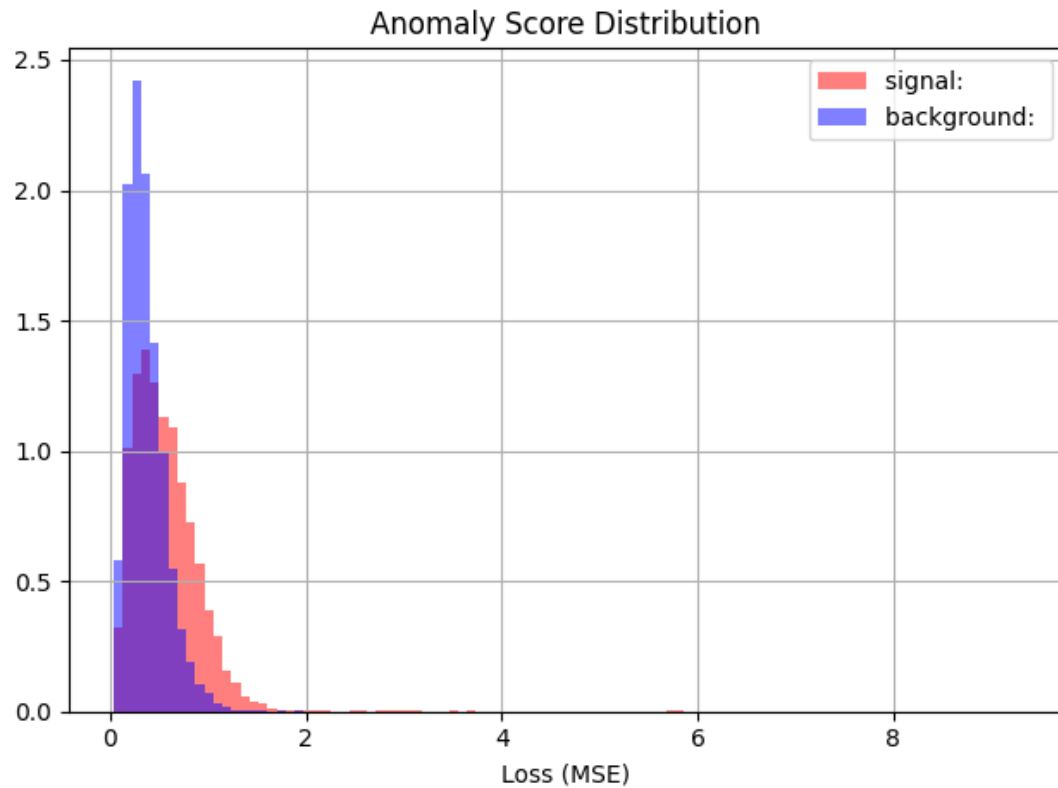

Invariant Mass

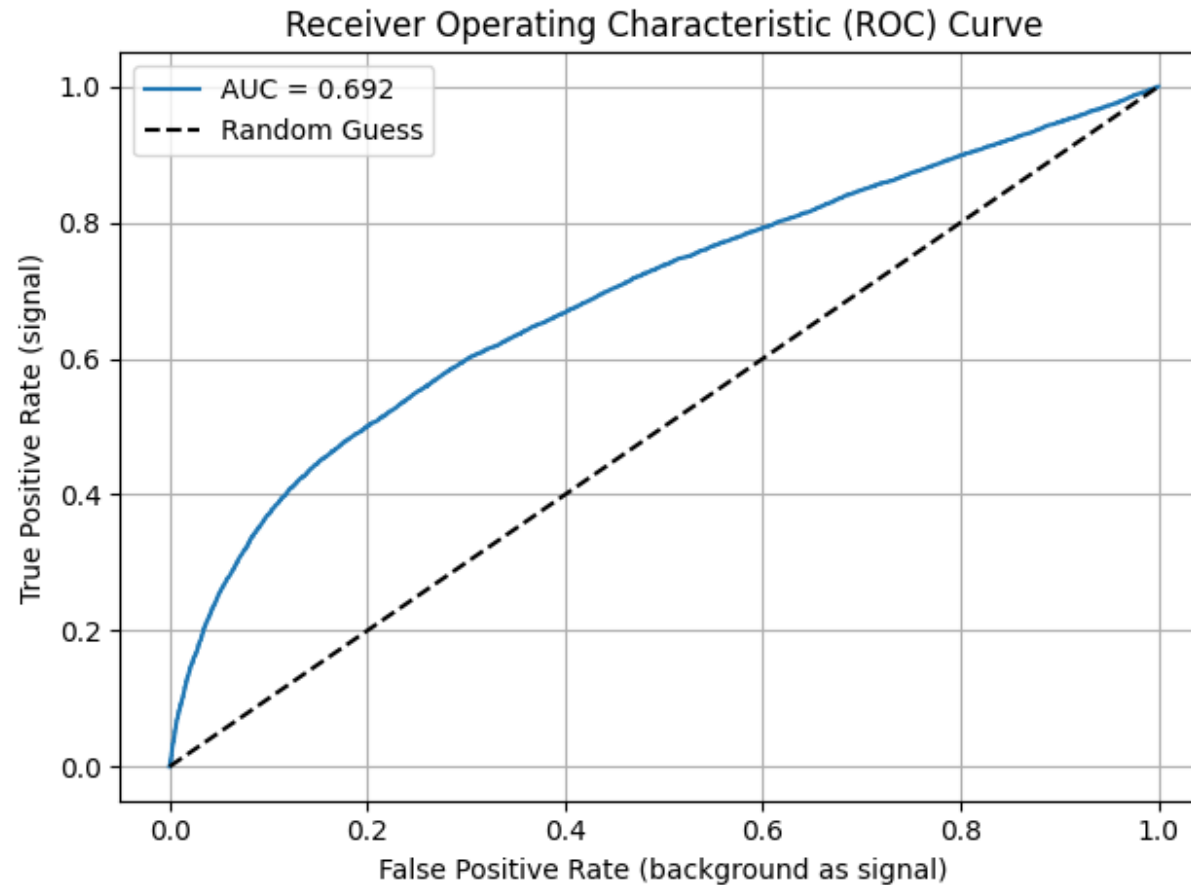

Invariant Mass

Hybrid (Eta-Phi and Mass)

Hybrid (Eta-Phi and Mass)

Next Steps

- Sweep different values for alpha to find best balance
- Train on QCD and WWto4Q, then try to detect WminusH
- Figure out optimal epoch to decay learning rate
